

cHuffman::setRacine

```
graph LR; A[cHuffman::setRacine] --> B[deleteTree]; B --> B;
```

The diagram illustrates a control flow between two functions. A gray rectangular box on the left contains the text 'cHuffman::setRacine'. A blue arrow points from the right side of this box to a white rectangular box on the right containing the text 'deleteTree'. Above the 'deleteTree' box, a blue curved arrow starts and ends at the same box, indicating a self-loop or recursive call.

deleteTree
